BRAKE APPLIED

New York Stock Market Said to Be in a State of Suspended Animation.

SPECULATIVE FUNDS

POLITICS GIVEN AS ONE OF THE CAUSES.

New York, Oct. 25 .- It would be difficult to extract a meaning from the action of today's stock market, beyond the negative inference of the determined abstention of all operators of any importance. The total sales for the day expended slightly over those of yesterday, but the increase was done during the first hour. For most of the day the market had a more stagnant appearance than for a long time past. ance than for a long time past. The duliness was partly attributable to the understanding that banking interests frowned upon the idea of any present speculative activity. Such essays as are made by traders to initiate a price movement bring to light the fact that the market is in a suspended state. A rise in prices brings out stocks in sufficient volume to check it, while a drive against prices will meet support in the shape of buying orders.

The political campaign is conceded to have some influence in suppressing the speculation and suspending financial plans which were supposed to be working out, and were relied on to stimulate Some additional attention speculation.

was said to be reaching a stage where some industries found themselves taking as said to be reaching a stage where me industries found themselves taking opplies in consequence, and some of the diroads were reported to be refusing all offered for transportation. The cogress of the London settlemen was atched with much interest. Tomorrow the day for payments on the stock arket settlement and financial difficulties would be disclosed at that time. Call thoney was again easier in this arket, notwithstanding further remitting the corresponding day one year ago. Another bullish factor was a report from Kansas City that wheat had been damaged by wind and rain. Late in the close was firm. December opened unchanged to 1s higher at 72% and vanced to 73% and closed at 72%. Steady cables and small local receipts caused moderate strength in corn. There was an active demand by pit traders and supplies in consequence, and some of the tailroads were reported to be refusing grain offered for transportation. The grain offered for transportation. The dam the rogress of the London settlemen was the watched with much interest. Tomorrow the market settlement and financial difficul-ties would be disclosed at that time. ties would be disclosed at that time.

Call money was again easier in this market, notwithstanding further remittances from here to London and to the seuth for cotton moving purposes. The government report on cotton ginned was regarded as satisfactory, but made no impression on stocks. Trading was heavy during the last and the closing was easy.

GRAIN AND PROVISIONS.

Do 41/28, certs., 91%

speculation. Some additional attention was given to friction of workmen on rail-roads both east and west. Denials were offered on behalf of some of the roads affected that any serious consequences were expected from the demands being nuade, but the reports by telegraph of the intended demands persisted.

The increasing shortage of freight cars was said to be reaching a stage where some industries found themselves taking

of the market was firm. December closed %@¼ higher at 33¼@333%.

Provisions were firm early in the day on an advance in hogs and a good demand for lard. Selling by packers and local longs caused a moderate reaction late in the session. At the close January pork was off 5, lard was unchanged and ribs were up a shede. and ribs were up a shade.

Continued from Page 6.

Copper company is still pending, and Manager Thomas Weir stated yesterday that nothing further would be done on the subject until after the return of Mr. Heinze from Ely, a week or ten days hence. H. G. Catrow, the Miamisburg (O.) banker who, with his immediate friends, exercises control of the property, came in from the east Wednesday night and will remain two or three days. That he is here to confer with Mr. Weir on details having to do with the deal there is no doubt.

Will be laid down at the mine within ten days. It will be installed at onee and a two-compartment working shaft, that has been started, will be lowered with all practicable dispatch to open the principal veins that traverse the company's estate at the same depth at which the Mohawk ore bodies were encountered, or in the sulphide zone. Development work will be under the direct personal supervision of John D. Campbell.

SEVIER CON STRIKE

no doubt.

During the lull in the negotiations Mr.
Heinze has decided to make an inspection
of properties at Ely and, according to information gathered yesterday, he will
likely return to Salt Lake by way of the
Deep Creek country. In company with
the Montana magnate is ex-Senator
Thomas Kearns, David Keith, Captain
Duncan MacVichie and Alfred Frank.
There is lots of significance in the trip the past week and the properties are otherwise in shape for an intelligent guess at their value, it is presumed the Montana operator and his engineers will take the measure of the proposition during their stay at camp. That they will also make a general inspection of the district goes without saying. Whether Heinze will buy into the camp remains to be

Whether it has been planned for Keith Whether it has been planned for Keith and Kearns to make the journey through the Deep Creek country or not could not be learned, but it came from a reliable source that, if too much time was not lost in Ely, Mr. Heinze and Mr. Frank would return cross-lots to Salt Lake in an automobile with Mr. MacVichie, the particular purpose being to size up conditions at the Gold Hill properties of Captain MacVichie's Western Utah Con-

Butter and Eggs.

New York, Oct. 25—Butter irregular; official prices, held seconds to extras, 151/20.

New York, Oct. 25—Butter irregular; official prices, held seconds to extras, 151/20.

Manager James stated that two shifts on the south side we are out twenty feet, thick and widening out with every shift's work. In the north drift we have now gone into the ore for twenty-six feet: on the south side we are out twenty feet, thick and widening out with every shift's work. In the north drift we have now gone into the ore for twenty-six feet: on the south side we are out twenty feet, thick and widening out with every shift's work. In the north drift we have now gone into the ore for twenty-six feet: on the south side we are out twenty feet, but the rich streak is not quite as wide on that side."

Manager James stated that two shifts which has the appearance of running again yesterday with samples of the rook which has the appearance of running again yesterday with samples of the rook which has the appearance of running again yesterday with samples of the rook which has the appearance of r

were constantly at work in the two drifts and he was sorry that he did not have a good hoist, as he could then operate much faster than with a whim, as at present. However, he states that he intends to equip the shaft right within a short time, and then he proposes to show the world that another big mine has been opened in Beaver county. He states that the ore as it is now being broken in running the drifts will require very little, if any sorting, to make a product that will net \$100 a ton, and this fact he will demonstrate shortly by hitting the market with a few carioads.

As previously stated in this department, the Black Rock property, while belonging to a corporation, is almost entirely owned by Mr. James and Willard F. Snyder who, as their associates in the proposition became stricken with "cold feet," promptly bought them out. The handling of the ground has been left entirely to Mr. James and he has never for a moment swerved from his original declaration that these was a mire in the

Salt Laker.

Sugar—Raw quiet; fair refining. 3½; centrifugal, .96 test, 4; molasses sugar, 3¼. Refined steady.

Wool Markets.

Boston, Oct. 25.—The volume of business concluded in the Boston wool market the past week, which aggregated fully 25,000,000 pounds, is the largest of any week of the year. There have been several weeks during the year when the aggregate of wool transfers has been between 10,000,000 and 15,000,000 pounds, but the only previous transfer of 25,000,000 pounds, so far as known. was in 190. In this week's dealings the bulk of the business was in territory and fleece wools.

Treasury Statement.

Washington, Oct. 25.—Today's statement of the treasury balances shows. Available cash balance, \$221,631,632; gold coin and bullion, \$109,016,843; gold certificates, \$40,065,764.

BUY INTO SEVEN TROUGHS. Senator Reed Smoot and Lafayette Holbrook in the Deal.

The sale of the noted Fairview group of claims at Seven Troughs by the discoverers, William Kavanaugh and J. J. Mackedon of Goldfield, to Senator Reed Smoot and a number of other Utah capitalists, marks a deal of the utmost importance to that district and Humboldt country in general says the Humboldt general, says the Humboldt

Mr. Mackedon, who was in Winnemuca last Friday on a business mission, stated that the deal as above stated was a practical certainty. He left that evening for Lovelock, where the first payment was to have been made the next day by Lafayette Holbrook, the representative of the purchasers.

The terms of the sale are said to be \$50,000 in cash, the payments to cover a period of three months, and 100,000 shares of the stock of the company.

The Fairview group is that on which the rich discovery was made by Messrs. 100 Messrs.

Iron was lower in the English market, with standard foundry quoted at 57s 2d.

Locally the market was firm and higher.

No. 1 foundry, 24.25@25.00; No. 2 foundry, 23.75; No. 1 foundry southern, 24.00@24.50;

No. 2 foundry southern, 24.00@24.50.

The original discovery was made by Messrs.

Kavanaugh and Mackedon about two months ago. A streak of ore said to run as high as \$60,000 to the ton in gold was uncovered and a number of sacks of this rich stuff were taken out. The owners refused a number of tempting offers for this property before finally accepting the one made by the Utah capitalists.

EIGHT FEET OF ORE.

Lou Dillon of Goldfield Producing \$60 Ore at Fifty-three Feet.

Lessees on Block 1 of the Lou Dillon Goldfield property have opened eight feet of \$60 ore at a depth of fifty-three feet. The vein is clearly defined and presents DOINGS OF THE MAGNATES

The vein is clearly defined and presents every indication of permanency, says the Goldfield News. It has a pitch of about 60 degrees, and the shaft has passed entirely through it. Sinking will be continued until a depth of 100 feet is reached, when a plant of machinery will be installed and a cross-cut driven to explore the newly discovered ore shoot.

The deal for the control of the Ohio Copper company is still pending, and Manager Thomas Weir stated vesterday.

SEVIER CON. STRIKE.

New Ledge That Carries Sensational Values in Gold Uncovered.

President Seymour W. Tulloch, of the Sevier Consolidated company, was in the city yesterday. He verifies all reports that have been made concerning the sen-sational strike that was made at the property a few days ago. The strike was reported by Assistant Manager W. W. McIntosh, when he reached the city Tuesday, but he declined to go into particu-lars. Mr. Tulloch says the strike was made practically at grass roots and that the ore, several feet of which is already exposed, will run all the way up to \$30,000

exposed, will run all the way up to \$30,000 a ton.

The discovery was made by Superintendent James Warden over the ridge a short distance west of the main workings of the property. He went prospecting the big outcrop there and at the surface got returns of \$20 a ton. Since then the ledge has been opened up to a width of seventeen feet, and the assays are running into the thousands. Picked samples will go up to nearly any amount.

TWO NEW STRIKES.

One Is Made Near Provo, the Other in American Fork.

Provo, Oct. 25.—John Clark is showing some very fine copper ore from his mine in Little canyon, southeast of this city. Mr. Clark states he has four feet of the ore, and several tons have been taken out ready for shipment.

T. N. Allman reports a big strike in the Whirlwind mine on Miller hill in American Fork canyon, in which he is interested, and has some very fine specimens of galena taken from the ore body mens of galena taken from the ore body which has been uncovered.

Mining Notes.

John Dern was in Bingham looking after his various interests in that camp yes-

Three cars of ore from Tintic, two from Bingham, four from Stockton and one from Ophir were reported at the Pioneer sampler yesterday morning. There were released from the Taylor & Brunton sampling works yesterday six carloads of ore from Nevada, three from Tintic, two from American Fork, one from Bingham, one from Nephi and one and 20 stop at intermediate points. from California.

Manager Sidney Bamberger reports that the new buildings at the West Columbus are going up as rapidly as material can be delivered at the property. He expects to have everything in shape for the winter campaign by the end of the present month.

Articles of incorporation of the First National Mining company of Park City were filed with the secretary of state yesterday. The company is to conduct a general mining and milling business. The claims of the company are what are known around Park City as the Graveyard group, being situated north of town, near the city cemetery. For some days work has been going on there, and many very flattering assays have been secured from rock taken out of the property.

DON'T LET YOUR MONEY LOAF.

If you have much or little money, better have it earning something. Remember, all fortunes had their foundation laid in saving, and money makes money only when it is put to work.

It isn't thrifty to let your money lie idle particularly when a strong financial institution would pay you four per cent per annum interest on it, compounded semi-annually. We are doing this for hundreds.

WHY WE CURE, where others fam: Our methods are up to date. We thoroughly understand our business and apply all our knowledge and skill on every case we undertake. We fulfill our promises and never accept a case unless we believe we can cure it. We study the peculiar nature of every individual case and treat the causes, not symptoms. We teach our patients how to help get well—what to eat and drink during the course of treatment and what to avoid. Coupled with the fact that we have the most complete and perfectly equipped office in Salt Lake City makes our statement rationally reasonable. If you are in doubt, call and see us; a few minutes talk will cost you nothing and may be the means of restoring you to health. As to terms: Our large practice enables us to cure for less money than the average so-called specialists—and you see the results before you are required to pay us. Honest, conscientious work speaks for itself. Pretenders, jealous of our success, try to belittle us because our fee is small, but intelligent men are not influenced by their arguments. We ask any man suffering from any disease we treat to call and see us. Many cases supposedly incurable are often the result of poor treatment, and the case is cured when methods such as we employ are directed toward the cause, and with care a proper attention to your case now your health may be prolonged indefinit. This alone should be incentive enough to induce you to try once more, now natter who has failed to cure you in the past. unless we believe we can cure it. We study the peculiar nature of every

CALL AND WE WILL EXPLAIN OUR METHODS ON TREATMENT.

You do not pay us until satisfied and you are restored to health. Can we say more? You may consult us free of charge and get our opinion without any cost to you. We cure all newly contracted diseases, blood poison, skin diseases, sores, ulcers, varicocele, hydrocele, nervous decline, piles and chronic diseases of the kidneys, stomach, heart, lungs and nervous system.

CONSULTATION FREE AND INVITED—Our reputation and work is not of a mushroom growth. We have been curing men for twenty years. Write if you cannot call.
